

## E-Series I – Table Top Electric Dental Unit

## **Ultima Electric Dental Series**

Ultima Dental and Bien-Air® have cooperated in developing the first electric driven dental machine specifically dedicated to small animal and equine dentistry. This breakthrough product provides the profession with a dedicated Ultima platform in conjunction with Bien-Air® Swiss electric handpiece technology. The compact system's electric handpiece delivers consistent torque differing significantly from air driven dental systems that can lose more than 50% of its speed when in contact with the surface to be cut.

## **Ultima Electric Dental Series features:**

- Consistent handpiece torque
- No brushing techniques when contacting dental surface as the handpiece maintains speed regardless of pressure
- Rapid wrist motion is eliminated relating to hand, wrist and arm fatigue
- Complete system new oil free mini-compressor used to cool handpiece and pressurize the water system
- No plumbing required with 2 1 liter water bottles

## **Ultima Electric Dental Series consists of:**

- 1 40,000 RPM electric handpiece
- 1 1:1 straight nose cone for speeds of 100 to 40,000 RPMs
- 1 5:1 contra angle for speeds of 10,000 to 200,000 RPMs
- 1 Satelec® LED Piezo Scaler
- 1 3 way water, air and mist syringe
- · Speed control to dial in your preferred speed
- Precision dental cuts will be more precise as the cutting bur does not need to leave the cutting surface
- · No Handpiece Vibration
- Precise Speed using either the power dial or the variable speed foot control
- Minimal Maintenance only need to oil and maintain the handpieces
- · Small Footprint
