

Every year, over 8 million metric tonnes of plastic are dumped into the ocean.

# ECO Vials

## Eco-Friendly Alternative to Plastic Pill Bottles

Designed to address the growing issue of single use plastic waste in the medical industry, KVP ECO Vials are the only pharmacy bottles made with PLA while also meeting FDA guidelines.

- 100% plant based and biodegradable
- Both dram and lid can be thrown away in household trash or recycled (#7)
- Complete degradation when exposed to moisture and heat in 3-6 months
- Takes 42% less energy than petroleum-based plastic to produce
- 32% reduction in greenhouse gases compared to petroleum based plastic

KVP ECO Vials are USP and CPSC compliant, as in they are well sealed, protected from light, and have Child-Resistant and Senior-Friendly Reversible caps.

Made from BIO-RESIN Polylactic Acid (PLA) Technology and plant-based renewable sources such as corn, these vials made from high grade material look, feel, and perform exactly like standard prescription bottles.
