

INTRODUCING

# SolutionKits™

**Convenience. Compliance.  
Complete SolutionKits™.**

Improve patient outcomes with same-day dosing and palatability. SolutionKits give veterinarians everything they need to compound prescriptions in the clinic quickly and accurately. Each kit is made in an FDA-registered facility, and contains two pre-weighed, pre-measured, and ready to mix components.

Available in  
Gabapentin,  
Metronidazole &  
Doxycycline

Does not contain  
Xylitol, making it  
safe for dogs

Pre-measured bottles  
ensure that final  
product is mixed  
correctly

2 year dating with  
180-day shelf life  
after mixing; no  
refrigeration  
required

Highly palatable  
chicken marshmallow  
flavor that increases  
compliance

**Easy to Mix.  
Easy to Dispense.  
Easy to Give.**

460 mL 50mg/mL

- Contains Doxycycline USP Powder and SolutionKits Chicken Marshmallow Suspension Vehicle
- Specifically formulated for veterinary use
- NDC # 46144-604-01

**Mixing Instructions**

- Tap the powder bottle on a hard surface to loosen the powder. Do not shake.
- Shake the suspension vehicle for 5 seconds.

- Pour half the suspension vehicle into the powder bottle using the included funnel.
- Shake vigorously for 60 seconds.
- Pour the rest of the suspension vehicle into the powder bottle. Allow to drain for a least 10 seconds.

- Shake for another 60 seconds.
- Record compounding date on bottle.
- Dispense into a prescription bottle.
