IMPORTANT SAFETY INFORMATION

Accidental self-injection of STELFONTA[®] (tigilanol tiglate injection) may cause severe wound formation. To decrease the risk of accidental self-injection, sedation of the dog may be necessary. In dogs, do not inject STELFONTA into subcutaneous mast cell tumors located above the elbow or hock. Formation of wounds, possibly extensive, is an intended and likely response to treatment with STELFONTA along with associated swelling, bruising and pain; these wounds are expected to heal. Some of these cases resulted in amputation. Appropriate pre- and post-treatment medications must be given, including a corticosteroid plus blocking agents for both H1 and H2 receptors, in order to decrease the potential for severe systemic adverse reactions, including death, from mast cell degranulation. For full prescribing information, contact VIRBAC at 1-800-338-3659 or visit <https://vet-us.virbac.com/stelfonta>.

Rules: Offer is only available to veterinarians that complete a STELFONTA[®] education event (in person or virtual sponsored CE) during the promotion period of April 15, 2024 to December 31, 2024. Each practice can participate twice during the program period, for a maximum of 4 bottles purchased with 2 free on the same invoice. This offer is not cumulative. This program can not be combined with other programs. Shelters, buying groups, and corporate accounts may participate. Orders must be placed through a Virbac representative to be transmitted to the practice's preferred veterinary distributor. Free goods in this offer are ineligible for return credit.
