

# VETBEDJET WARM AIR SYSTEM

## Hypothermia Prevention

Keeping patients warm during surgery and recovery has always been a challenge. Electric pads have a risk of overheating and circulating water blankets are easily damaged. Most warm air units require the use of an expensive disposable blanket or reusable blankets.

The VetBedJet warm air system provides warm air flow comfortably either from under or from the top downward over the anesthetized patient. Your patients will recover more quickly and safely when performing any procedure which requires anesthesia or hypothermia prevention. Unit is not compatible with Mobile practices.

**BLUETOOTH TECHNOLOGY WITH ITS OWN FREE APP!**

**BUTTON FOR REPLACEMENT OF HEPA FILTER**

**POWER BUTTON & INDICATORS**

**J1034 Series**  
Comfortable and Reusable Cloth Blankets

### FEATURES
